

Marketplace Exercise

Challenge Title: Exploration of the Marketplace to find services that extend the CyberSuite Framework

Challenge Context and Purpose: In the 2nd Hackathon, the participants will act as Marketplace Service Consumers (Customers). They will explore the services already available in the Marketplace, download them to see more details and use them in the CyberSuite Framework to extend its capabilities with these add-on services.

Goals of the Challenge:

- Gather user feedback and identify areas for potential improvement of the Marketplace.
- Assess the user acceptance of the Marketplace.
- Verify/test its operation in 'real-life' circumstances.
- Onboard and gain the attention of external users.

Key Tasks for Participants (Instructions): The following steps should be performed:

1. Enter the Marketplace: <https://marketplace.cybersuite.s5projects.eu>
2. Register (sign up) as Customer and fill in the requested information.
3. After your registration is approved by the Marketplace Admin you can sign in the Marketplace. Admins will approve registrations promptly during the hackathon session.
4. Explore the Marketplace: landing page and FAQ for the CyberSuite Customer, listed services, notifications. You can use the chat bubble to ask questions to the Marketplace Support or the Provider of a specific service.
5. Find a specific policy compatible with an asset (e.g. PUZZLE) to allow images only from specific repositories. Use the available filters (e.g. relevant CyberSuite asset), text-based search to identify it.
6. Once you find the **Allowed Repositories** policy, check its profile, instructions, and add to favourites.
7. Download the **Allowed Repositories** policy. Use a text editor to open and view the template.
8. OPTIONAL: Hop to the CyberSuite Framework to use the pre-configured policy together with PUZZLE. Note: to speed-up the process the preconfigured policy is available in the CyberSuite Framework. Follow instructions of the platform for this action.
9. OPTIONAL: After you see the capabilities of the used policy, you can go back to the Marketplace and leave a review/rating to the policy you used!

Feedback and Evaluation Requirements: Participants should provide feedback and rate the service through the Ex-Post survey

Resources and Tools Provided: CyberSuite Marketplace, CyberSuite Framework, text editor to open and view the downloaded templates

Estimated Time Requirement: 10 minutes

Contact Point (Optional): stefanos@suite5.eu
